Desktop Laminating

FEATURES & BENEFITS

Temperature: Variable heat controls

Speed: Variable speed controls

Reverse: To clear jams

Hot & Cold: Allows for both types of lamination

Counter & Reset: Measure amount of lamination produced in a session

Memory Function: For preset jobs

Measure: Measure actual roller temperature

Max Laminating Width: 13 inches

Max Laminating Speed: 12 feet

Max Pouch Thickness: 14 mil

Number of Rollers: 10

Operating Temperature: 0° to 160° C

Preheating Time: 5 minutes

Power Consumption: 1500 watts

Dimensions: 21" L x 13$^{3/4}$" W x 6$^{1/4}$" H

Weight: 55 lbs.

Speedy-Lam 3330R10

Roller Pouch Laminator

The **Speedy-Lam 330R10 10 Roller Laminator** is the fastest pouch laminator available, it will laminate up to 12' per minute. That allows you to run a letter sized pouch every 5 seconds.
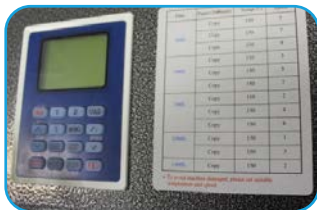

The Speedy-Lam 330R10 offers 6 heated rollers, 2 cooling rollers and 2 outlet rollers. This unique 10 roller system offers super-fast lamination speeds while assuring high quality results even on difficult to laminate items such as photos, inkjet prints and color copies.

Patented cooling system keeps the exterior of the laminator cool to the touch even when doing long production runs.

The Speedy-Lam 330R10 offers a cool down cycle. Just press and holding the power button, this activates the cool down cycle. The cooling fans will continue to run until the machine has reached the correct shut down temperature. When the system is cooled it will automatically shut itself off thus preventing damage to the heated rollers.

The easy to remove top roller cover makes maintenance on the system simple. Electrical is CE Approved!

SPECIFICATIONS

Throat Capacity	13" (330mm)
Max Pouch Thickness	14 mil
Controls	Digital
Speed Controls	Variable
Laminating Speeds	Up to 12' per min.
Number of Rollers	10
Operating Temperature	Up to 320° F
Heater Type	Heated Rollers
Number of Heated Rollers	6
Reverse Switch	Yes
Power	1500 Watts
Preheating Time	5 minutes
