

DCR-400

CORNER ROUNDING MACHINE

Item#: 04JBDCR400

The **DCR400** is a compact machine designed to make round corners on any material ranging from books, note pads, diaries, cards. Right and left corners can be cut simultaneously in a single stroke. The cutting thickness of up to 100mm combined with a mechanical speed of up to 24 cycles / minute provide optimum output for a one man operation. It is the ideal solution for medium to long runs with a regular output.

Specifications

Feeding Mode	Manual
Paper Size	Min: 88 x 55 mm< Max: 400 x 297 mm
Speed	24 cycles/minute
Max Cutting Thickness (paper only)	100 mm
Die Radius from	1/8" to 1"
Work Table Adjustable Angle	Up to 20°
Voltage	200/240 V (50 Hz) 1 ph - 110/120 V (60 Hz) 1 ph
Power Consumption	0.25 kW
Air Pressure	6 to 8 bars
Dimensions	0.84 x 0.83 x 1.31 (H/a) m
Net Weight	220 kg

Key Benefits & Features:

- The right and left corners can be cut simultaneously in a single stroke. The cutting thickness of up to 100mm combined with a speed of up to 24 cycles / minute provide optimum output for a one man operation.
- The DCR 400 can accommodate a wide range of dies with radius ranging from 1/8" to 1". It can also be operated as a single corner rounding machine.
- Easy adjustments and adjustable work table angle ensure optimum working conditions.
