

BB50H

High Speed Semi-Automatic Binder

The James Burn Lhermite® BB50H finishes documents and calendars up to 20" wide, with variable output of 600-1200 books/hour. It can skip bind and includes a central hanger feed system which can be disengaged.

The BB50H automatically finishes hand fed pre-punched documents with Wire-O® sizes from 1/4" up to 1", using traditional spools or our patented SnakeSkin™ Wire in 3:1 and 2:1 pitches. Size, pitch and format changes are electronically controlled from the user-friendly 'Touch Key' pad.

FEATURES & BENEFITS

Versatile: BB50H finishes documents and calendars up to 20" in width.

Productive: High output speeds of 600-1200 books per hour, depending on finishing type and operator skill.

Easy to Use: Automatically cuts wire to length, feeds and positions wire for insertion, and finishes hand fed pre-punched documents and calendars.

Adaptable: Accommodates all Wire-O® sizes from 1/4" up to 1", using either standard or jumbo spools in 3:1 and 2:1 pitches.

Skip Binds: With or without calendar hangers

Hanger Features: Central hanger feed system on both models, which can be disengaged. "Missing Hanger" detectors. Uses #'s 2, 3 & 4 Standard and Euroslot-style hangers from 4"-16".

Touch Keypad Control: Most functions variable and keypad controlled including size, pitch and format changes.

Accessible: All tool changes and adjustments made easily from front of machine.

Efficient: Finishes from economical Wire-O® spools. Automatic features reduce make-readies.

Ergonomic Design: Operator-friendly with large table-top working surface helps reduce fatigue.

Air Required: - 80 PSI using 15 CFM max

Voltage Requirements: 115v 60 Hz
