

# COMBO JUNIOR

## COMBO JUNIOR SHRINK WRAP SYSTEM

The **Combo Junior** is a combination of a tabletop L-Sealer and a tabletop tunnel. These units can be used separately or together to pack/shrink small quantities (approx. 10 cycles/min.) of products.

The **Combo Junior** provides many of the same high quality features of our larger combination shrink systems in a compact, tabletop design. These small machines are easy to operate and have an excellent shrink result.

The patented **Simpulse™ Heat System** on the L-Sealer is an impulse trim sealer that allows for lower energy use and greater safety than constant heat units. The shrink tunnel provides complete heating from top sides and bottom along with the same cool down safety controls as our larger tunnels.

## FEATURES & BENEFITS

- The **Circulair Heat Chamber™** provides efficient and customizable air-flow for perfect packages
- The **Micro Perforation Wheel** makes fine holes in the film allowing trapped air to escape in the shrink process, ensuring high quality packages
- Automatic cool down circuit protect tunnel controls during shut-down, allowing the operator to walk away immediately
- Ergonomic design with cushioned handle and magnetic hold-down for better trim seals (B & D models)

L-SEALER

TUNNEL

Tunnel and L-Sealer combined

## SPECIFICATIONS

Maximum Film Width	16 inches
Maximum Product Size	12"L x 11"W x 5"H
Combo Junior A	Tabletop L-Sealer with manual take-away 14" x 16", combined with 20"L x 16" W x 8"H variable speed shrink tunnel
Combo Junior B	Tabletop L-Sealer with magnetic hold-down 14" x 16", combined with 20"L x 16"W x 8"H variable speed shrink tunnel
Combo Junior C	Tabletop L-Sealer with manual take-away 14" x 16", combined with 15"L x 13"W x "H variable speed shrink tunnel
Combo Junior D	Tabletop L-Sealer with magnetic hold-down 14" x 16", combined with 15"L x 13"W x "H variable speed shrink tunnel
Electrical Requirements	120V
