

# J2436 Professional Padding Press

The Martin Yale® J2436 is a single-person operation professional padding press. The centered pivot point prevents the unit from drastically tipping while loading and unloading, while the positive locking door draw latches keep doors from inadvertently opening. Additional safety and ergonomic features include: twin doors with easy to use thumb latches, no pinch or crush points, locking casters, spring-loaded tilt latch and shallow tilt angle which allows for safer tilting and easier positioning for durability and functionality. Heavy duty solid steel construction made proudly in the U.S. of A.

**Positive Locking Door Draw Latches** keep doors from inadvertently opening while loading

**Drip tray** easily holds tools and standard size quart cans

**Supply shelf** conveniently stores glues and brushes

**Twin doors** with easy to use spring-loaded thumb latches

**Locking casters** keeps unit safe and stable during loading and unloading
