**KEENCUT**

THE WORLD'S FINEST CUTTING MACHINES

**ROTARY CUTTERS**

**MAT CUTTERS**

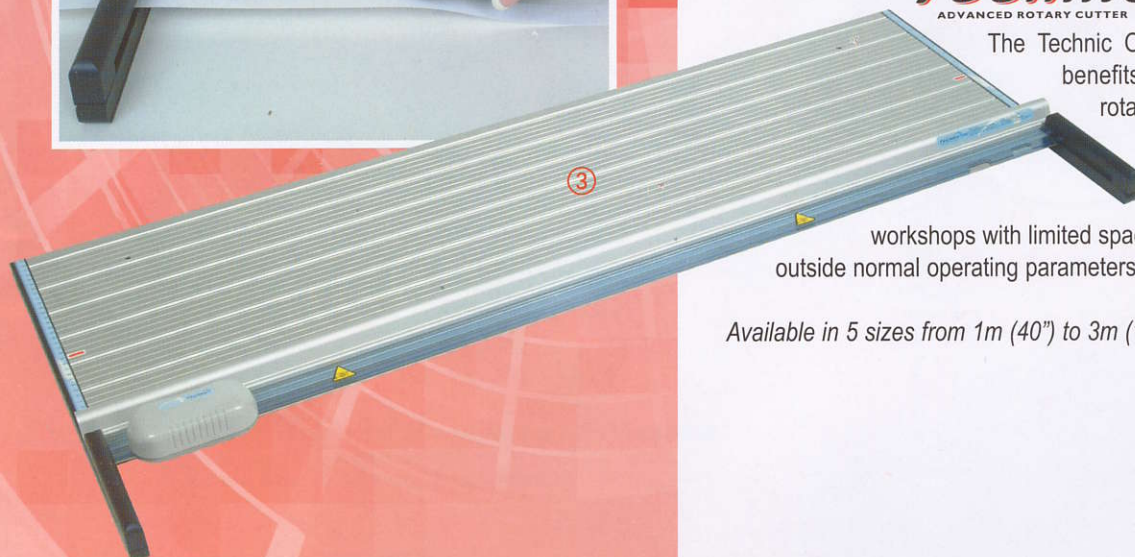

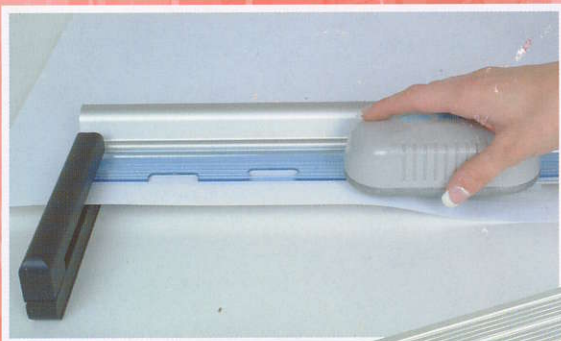

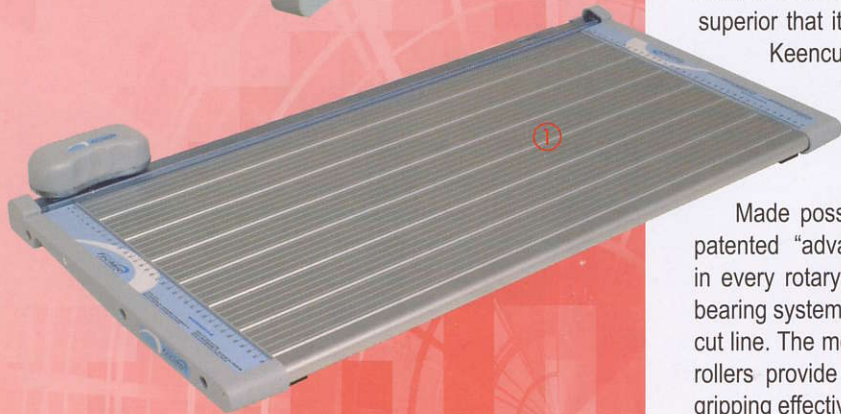

**CUTTER BARS**

**SHEET  
MATERIAL  
CUTTERS**

Keencut offers the widest choice of rotary cutters in the world. From the evolutionary Classic series to the revolutionary all new Technic series there is a Keencut rotary cutter for a multitude of applications. Equally capable of cutting the thinnest of tissue and film to heavy cardboard, metals, plastics, fabrics and much more up to 3 metres (120") in length, there is a Keencut rotary cutter just right for the job. Superbly styled and strongly built to look and perform "like new" for many years both the Classic and the Technic feature an extruded and silver anodised base, ultra low friction bearings and fully enclosed self honing cutting wheels. Keencut rotary cutters are designed to give years of peak performance and will enhance every workplace, school or office in which they are used.

#### FEATURES

- All aluminium extruded and silver anodised base for strength and straightness.
- Smooth, elegant ultra modern design for years of good looks.
- Excellent build quality with the precision of computer controlled manufacturing.
- 21st Century material technology for the finest performance and precision.
- 5 year full guarantee excluding replacement cutting wheels.
- Extensive range of special purpose accessories.
- Award winning customer service.
- Outstanding value for money.

Once in a while a truly innovative tool is introduced that is so obviously technically superior that it evokes the question "why didn't someone think of that before".

Keencut Technic ① is just such a product. Remarkably different to any other rotary cutter, the Keencut Technic is the culmination of 34 years experience in the design and manufacturing of world-class advanced cutting machines.

Made possible with the astonishing power of computer design, Keencut's patented "advanced rotary cutter" system addresses the shortcomings inherent in every rotary cutter on the market today. The unique sub-surface monorail bearing system ② means there is no overhead guide mechanism to obscure the cut line. The mechanism cannot distort under heavy cutting pressure, two clamp rollers provide secure double clamping during cutting with up to double the gripping effectiveness of any other rotary cutter and the two tungsten steel cutting wheels give unrivalled performance and long life with two way cutting on every one of the 13 models in the range.

Available in 13 sizes from 305mm (12") to 3048mm (120"), Keencut Technic is truly in a class of its own.

The Technic OE ③ (open ended) combines the benefits of Keencut's patented "advanced rotary cutting system" with a unique design of end frame allowing the cutter to accept materials wider than the cutter itself. Ideal for use in workshops with limited space or for those occasional jobs that fall outside normal operating parameters.

Available in 5 sizes from 1m (40") to 3m (120")

## KEENCUT Technic TE

ADVANCED ROTARY CUTTER

Designed to fit the edge of any work surface, the Technic TE **④** (table edge) will turn the most basic work bench into a superb cutting table ideal for large format materials. Like all Technic cutters the TE will cut in both directions but with the added benefit of an increased working area will allow the largest work to be easily aligned and trimmed single-handed.

Available in 5 sizes from 1m (40") to 3m (120")

## KEENCUT Classic

ROTARY CUTTER

The Keencut Classic rotary cutter **⑤** is an evolutionary machine which combines superior performance, construction and durability for those users who are more comfortable with the familiar operation of traditional overhead rail rotary trimmers. Using an unbreakable anodised aluminium base and tough metal castings, the Classic is built to easily withstand the knocks and accidents that break particle board.

Surpassing all traditional style rotary cutters in elegance, performance and durability the Keencut Classic is a machine designed for the exacting demands of the 21st Century. Twin overhead guide rails in stainless steel, silent glide bearings, die cast end plates **⑥** and an ergonomically designed "all metal" cutter head **⑦** means the Keencut Classic will outshine, outperform and with its 400mm wide warp free aluminium base it will outlast any other cutter of this type.

Heavy duty construction coupled with state of the art technology will help ensure that the Keencut Classic becomes the standard by which all other "overhead guide rail" cutters are judged.

Available in 9 sizes from 305mm (12") up to 1372mm (54"). Traditional it may be but the Keencut Classic is no ordinary rotary cutter.

### OPTIONAL ACCESSORIES To fit all models except Technic TE

**⑧** Roll Dispenser

To fit Technic 762mm (302) and above, Classic 762mm (30") and above and Technic OE

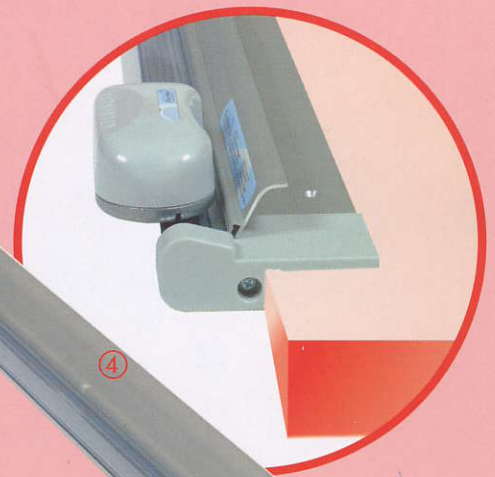

**⑨** Stand

**⑩** Waste Catcher

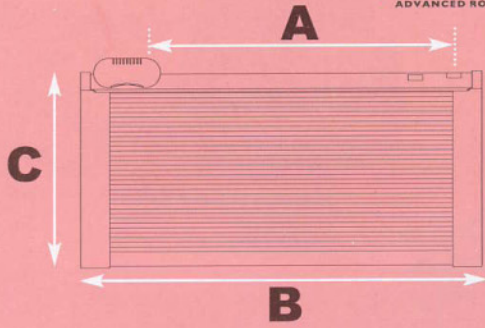

**⑪** Extended squaring arm

Keencut Rotary Cutters are not just trimmers, they are tough cutting machines factory guaranteed to give many years of service.

Backed by award Winning service (our commitment to service is posted on [www.keencut.co.uk](http://www.keencut.co.uk)). Keencut Rotary Cutters belong in every factory, office, school and workshop where sheet materials are cut.

### Guarantees

- 5 year comprehensive guarantee
- 20 year free replacement guarantee on all bearings
- 30 day, no quibble, money back guarantee

### Full KEENCUT Product Range

- Cutter Bars
- Sheet Material Cutters
- Rotary Cutters
- Mat Cutters
