

# Paitec LJ3200 Air Jogger

## FEATURES:

- Designed for the laser printer environment
- Cools laser printed documents
- Anion ionizer minimizes static between paper sheets
- Perfect for preparing documents for folders, folders/inserters, & pressure sealers
- Large jogging bin holds up to 2 reams of paper
- Four air stream slots provide constant flow for cooling documents
- Powerful 3,000 RPM Motor quickly jogs documents
- Works with 115V or 230V electrical systems
- Shock absorbing feet minimize noise and vibration
- Convenient ON/OFF foot pedal and adjustable vibration speed

Paper handling equipment is greatly affected by paper temperature and room humidity. Equipment operators are usually instructed to let laser printed documents cool down before processing. The Paitec USA Laser 3200 Air Jogger eliminates that waiting period.

The Paitec USA Laser 3200 Air Jogger provides a steady stream of air to cool printed documents and utilizes unique Anion ionization technology to eliminate static build-up between sheets.

With its adjustable speed and large bin capacity, the Paitec USA Laser 3200 Air Jogger handles all weights of paper, cardstock, and envelopes.

## SPECIFICATIONS:

<b>Speed:</b>	3,000 RPM Motor with variable speed
<b>Capacity:</b>	Holds up to two reams of 11" x 17" paper
<b>Size:</b>	Small footprint - 22" x 18"
<b>Weight:</b>	Easily portable - 28 lbs.
<b>Electrical:</b>	115 - 230 Switchable Voltage - 2 Amps.
