

OD4012 Electric Punch

The OD-4012 accepts 4 interchangeable binding modules for flexible space saving punch and bind combinations.

It has the E-Z Change Die system and comes with both a manual and an auto-reversing feature that prevents jams.

The OD4012 uses 11-3/4 or A4 size dies with open sides for wider sheet punching capability.

OD4800 & OD4000 dies and modules work on the OD4012; adding additional useful life to existing equipment.

It has easy "Paper to Pin" sight alignment, for balanced hole to edge margins on odd-sized applications and features our unique punch registration system that assures accurate margins on an 11" sheet regardless of which die is used.

Punching capacity rated at 22 sheets of 20 lb bond paper. The number of sheets depends on the paper weight and punch pattern used. (One punching die included with machine purchase)

Binding machines can be added to your system:
The HD4470 for plastic comb binding, EWC8370, HD8370, HC8000 for wire binding.
Or the HD4170 for plastic coil binding.

Optional Mounting Brackets allow it to be securely attached or you can use the binding units free standing, to create separate punch and bind stations.

SPINE COMPATIBILITY AND SHEET CAPACITY

Plastic Coil

Sheet punching capacity 18

Plastic Comb

Sheet punching capacity 20

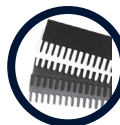

VeloBind

Sheet punching capacity 22

Wire-O

Sheet punching capacity 20

PaperLock

Sheet punching capacity 20

Loose Leaf

Sheet punching capacity 22

Sheet capacity is based on 20lb. bond paper. Sheet capacity is for 4:1 pitch, round-hole die sets.
